

Our Equipment

The Chasing M2 Pro Max is an industrial grade Remotely Operated Vehicle (ROV). It boasts quick assembly technology and a new generation shore-based power supply system with 4 hours battery life on full charge. The Chasing M2 Pro Max camera supports up to 4k video. With a 200m dive depth and 400m movement radius this ROV can meet the needs of a wider range of operations.

ROV Service

About Us

Aqualicense is an Irish-owned and Irish-based marine consultancy firm that is passionate about the marine environment and sustainable marine development. We have a strong focus on innovation across all of our projects and pride ourselves on being leaders in the industry.

Aqualicense supports coastal marine businesses through the promotion of sustainable technology and practices, helping to maximise the use of marine space while minimising impacts.

Why Choose Us?

Through innovative methods and solutions Aqualicense aims to tackle the challenges facing different marine and offshore industries. The use of an underwater ROV can greatly reduce both the cost and risk in comparison to conventional inspection methods, while also providing real time information and high-resolution footage. We will provide you with the recorded, edited video footage which can be advantageously archived for comparison and future analysis. At Aqualicense we utilize our expertise in aquaculture, GIS, media and marine science to provide a comprehensive range of services and elevate ourselves within the marine industry.

Our Services

Aqualicense aims to provide a range of investigatory underwater services. Our services can be tailored to suit each client's specific interests and concerns, providing a flexible approach to problem solving and consultation. These services include:

- Vessel, Hull & Mooring Line Inspection
- Aquaculture
- Shellfish Bed Monitoring
- Pot Fisheries Investigation
- Marine Infrastructure
- Environmental Survey
- Academic Research
- Site Verification
- Multimedia
- GIS Mapping

As part of our service offering, Aqualicense can apply for available funding opportunities on your behalf. Contact us for more information.
